

Strategic Data Engineer and Analyst with mid-level experience building cloud data ecosystems for Cybersecurity and FinTech. Skilled in automating pipelines using **PySpark, Snowflake, and Databricks**, consistently achieving 30%+ runtime reductions. Led creation of patent-pending ML products that convert fragmented data into executive-level insights. Ready to apply data engineering expertise to drive secure, data-driven decisions for the organization.

PROFESSIONAL EXPERIENCE

Security Data Analyst | Pyramid Consulting Inc. (Client: Capital One) - San Diego, CA | Oct 2024-May 2025

- **Pioneered the automation of the Cybersecurity Controls Monitoring framework** as a core member of a newly formed squad, engineering end-to-end ETL pipelines in Databricks and PySpark to transition manual audits into real-time, data-driven assessments.
- **Architected robust Snowflake schemas and optimized ingestion** by transitioning raw landing data from CSV to **Parquet**; leveraged columnar storage and predicate pushdown to **reduce Spark execution time by 25%** across disparate sources including Presto, OneLake, and Viking.
- **Developed a "Green-Yellow-Red" health matrix** via SQL logic to categorize security control health, visualized in QuickSight with automated owner notifications.
- Orchestrated cross-functional collaboration with product owners and AWS specialists to deliver the organization's first **leadership-level security dashboard prototype**.

Independent Data Consultant | Freelance - Remote in USA | Sep 2023-Sep 2024

- **Engineered statistical models** for private clients to forecast financial profitability with **80%+ accuracy** and identified key market risks through deep-dive portfolio analysis.
- Developed expertise in **Apache Spark & Machine Learning**, completing 20+ hours of hands-on ML projects and tutorials to build proficiency during a professional transition; became proficient in data architecture.

Data Analyst | Pyramid Consulting Inc. (Client: Capital One) - Remote in USA | Feb 2022-Jun 2023

- **Engineered cross-functional BI solutions in Tableau and QuickSight**, leveraging complex SQL to integrate data from Snowflake, Hive, and ACBS.
- **Architected automated ETL pipelines in Databricks**, eliminating **20+ hours of manual weekly processing** and improving quarterly forecasting accuracy by **10%**.
- **Optimized Hive processing** via partitioning and bucketing, resulting in a **30% reduction in query runtime** and significant cloud-compute cost savings.

Data Analyst (RevOps) | Navigate360 (via Vetro Technologies) - Remote in USA | Sep 2020-Oct 2021

- **Architected an AWS Redshift Data Warehouse**, migrating siloed Salesforce and Google Analytics data into a "Single Source of Truth" for executive decision-making.
- **Engineered automated ETL pipelines** utilizing **AWS Glue, S3, and AppFlow**, leveraging **Lambda** functions for custom orchestration and scheduling to ensure 24/7 data availability for stakeholder reporting.
- **Developed Python-based sanitization scripts**, utilizing Regex and Pandas to decompose unified address strings into granular, queryable dimensions (Zip, State, City, Street).
- Transformed raw telemetry into actionable insights by connecting **Tableau** directly to Redshift, delivering interactive dashboards that **visualized critical KPIs** and streamlined **Salesforce reporting** for the leadership team.

Junior Data Scientist | ThreatModeler Software Inc - Jersey City, NJ | Aug 2019-Sep 2020

- **Pioneered a first-of-its-kind NLP engine** to interpret DFD diagrams, achieving **85% precision** in vulnerability prediction and reducing manual review cycles by **40%**.
- **Presented technical POC to the CEO**, directly contributing to a **company patent filing** for a novel ML-driven threat detection methodology.

Note: June 2025-Apr 2026: Sabbatical to transition into motherhood – an experience that enhanced my ability to manage competing priorities, execute complex tasks, improve verbal & non-verbal communication, and lead with empathy.

EARLY CAREER & INTERNSHIPS

- **LTIMindtree | ML Intern, NJ**: Engineered food-recognition prototype via AWS DeepLens; improved accuracy by 13%. (2018)

- **iCreate Technologies | Software Intern, India:** Developed Java-based back-end services for an online veterinary e-commerce platform. (2016 – 2017)

EDUCATION

- MS in Project Management, **University of Cumberlands** | GPA: 3.64/4 | *Dec 2023*
- MS in Computer and Information Sciences, **New York Institute of Technology** | GPA: 3.49/4 | *May 2019*
- Bachelor of Engineering in Computer Engineering, **Gujarat Technological University** | CGPA: 7.55/10 | *May 2017*

TECHNICAL SKILLS

- **Programming:** Python, SQL, Java, Apache Spark
- **Reporting/BI Tools:** Tableau, Microsoft Excel, Quicksight, Databricks, JIRA, Jupyter Notebook, GitHub
- **Databases:** MS-SQL Server, MySQL, Oracle
- **Cloud / Big Data:** AWS (Redshift, Glue, S3, Lambda, AppFlow, Sagemaker), Snowflake, Databricks, PySpark, Hive, Hadoop
- **ML Models:** Predictive Modeling (Linear/Logistic Regression), Time-Series Forecasting (Prophet), Clustering (K-Means), Decision Trees, Random Forest, LLM
- **AI Tools & Technology:** Cursor, Claude, ChatGPT, Gemini, GitHub Copilot, Generative AI, Prompt Engineering, Vibe coding
- **Self Guided Technical Projects:** [Dark Web Price Index](#) | [Natural Gas Price Interpolation](#) | [Predicting Probability of Default](#) | [Apache Spark ML Project](#)

CERTIFICATIONS & AWARDS

- **Outspoken Award (ThreatModeler):** Awarded for exceptional technical partnership and professional candor; recognized for driving model integrity through rigorous peer review and collaborative problem-solving.
- [Data & Analytics Job Simulation for Deloitte - Forage](#) | [J.P. Morgan's Quantitative Research Simulation - Forage](#)
- Apache Spark for Data Engineering and Machine Learning - [IBM Certificate BD0231EN](#) | Using Python for Research - [HarvardX](#)
